## BIRLA INSTITUTE OF TECHNOLOGY, MESRA OFF CAMPUS DEOGHAR

Subject: CS235 Computer Organization & Architecture
Date:02/09/2024

Quiz: 1 Time: 50Min

- Q1. Represent the decimal numbers 45, -37, -61, and 57 as signed 7-bit numbers in the following binary formats. (i) sign-and-magnitude, (ii) 1's complement and (iii) 2's complement (2]

  Q2. Perform addition and subtraction on each pair [(+21) & (-14)] and [(-41) & (+14)] in binary using 2's complement and indicate whether there is overflow or not.

  [2]

  Q3. Represent the decimal number (-147.625)<sub>10</sub> in IEEE 754 single precision as well as double precision format.
- Q4. Draw the flowchart for Booths multiplication algorithm. Multiply the two numbers -7 and 9 using booth's algorithm using 6-bit register.

  [4]
